

The Ultimate DevOps Platform Buyer's Checklist

Discover the best platform for your team by following this checklist

Feature	Opsera	Vendor 2	Vendor 3
Integration			
Number of integrated tools	80+		
Covers all existing DevOps tools	✓		
Covers future DevOps tools	✓		
Generic integration capabilities (webhooks, APIs, integration-on-demand)	✓		
Easy to use: One-time integration effort	✓		
Platform takes care of integration maintenance	✓		
Automated configuration management	✓		
Secrets management	✓		

Feature	Opsera	Vendor 2	Vendor 3
Toolchain automation			
	Declare and deploy custom toolchains	✓	
	Role-based access control over toolchains	✓	
CI/CD pipeline builder			
	Intuitive pipeline builder (no-code, drag-and-drop)	✓	
	Event-based triggers	✓	
	Time-scheduled triggers	✓	
	Manual triggers	✓	
	Multi-level logging - info (create, update, delete), warning, errors	✓	
	Pipeline alerts for success/fail	✓	
	Customizable thresholds and definitions of pipeline pass/fail	✓	
	Reusable pipelines	✓	
	Shareable pipelines	✓	
	Templatizeable pipelines	✓	
	Role-back access control for pipelines	✓	
	Pipelines search functionality	✓	

Feature		Opsera	Vendor 2	Vendor 3
CI/CD pipeline builder				
	Refined execution control	✓		
	Infrastructure-as-code-pipelines	✓		
Observability: Monitoring and logging				
	Creates audit log	✓		
	Exposes audit log for analysis and export	✓		
	Customizable audit log alertslog	✓		
	Monitoring via 3rd Party integrations	✓		
	Monitoring via audit log alertslog	✓		
	Monitoring via metrics and insights	✓		
Unified insights				
	Number of out-of-the-box metrics	150+		
	Cross-platform metric reporting (not just individual tool reporting)	✓		
	Developer productivity metrics	✓		
	Product quality metrics	✓		
	DORA performance metrics	✓		

Feature		Opsera	Vendor 2	Vendor 3
Unified insights				
	Pipeline metrics	✓		
	Security metrics	✓		
	Customizable dashboards	✓		
	Insights notifications for KPIs	✓		
	DORA performance metrics	✓		
Security and quality				
	Integrates with tools providing quality tests (unit, integration, functional, performance, load, stress, regression, and acceptance tests)	✓		
	Integrates with tools providing security tests (SAST, DAST, SCA, container security testing, IaC security testing, vulnerability scanning, and authentication and authorization testing)	✓		
	Encrypts and secures secrets out-of-the-box	✓		
	Role-based access control at every platform level	✓		
	Bring Your Own Vault	✓		
	Approval Gateplatform level	✓		
	Security alerts	✓		

Feature		Opsera	Vendor 2	Vendor 3
Pricing				
	Platform ROI outweighs the cost	✓		
	Free trial	✓		
Ease of use				
	No-code, drag-and-drop features	✓		
	Extensive documentation with how-to guides	✓		
	On-demand webinars for advanced use cases and industry best practices	✓		
	Scalable	✓		
Customer satisfaction				
	Average customer satisfaction on G2	4.6/5		
	Number of recent awards for best-in-class performance	5
